CAHPS® for ACOs Survey Survey Instructions and CATI Script

Instructions for Conducting the Survey via CATI

Overview

This telephone interview script is provided to assist interviewers while attempting to administer the CAHPS for ACOs Survey.

Instructions for Survey Vendors:

- The scripts provided in this document use the same questions as those found in the mail version of the CAHPS for ACOs Survey.
- To ensure comparability, neither an ACO nor a survey vendor may change the wording of the survey questions, the response categories, or the order of the questions in any of the surveys.
- The CATI script provided by CMS must be read verbatim.
- The CATI script does not provide scripted language for scheduling a call back, ending an interview at the request of the beneficiary before the survey is completed, etc. Survey vendors may use their internal scripting for such modules.
- All text that appears in lowercase letters must be read out loud.
- For all questions that use “Never/Sometimes/Usually/Always” response scale, the interviewer should say, “Would you say...,” before reading the response options to the respondent.
- Text within a question that is in one of the following styles: underlined, or **bolded**, or highlighted, or IN UPPERCASE LETTERING, or *italicized* must be emphasized.

*Note: Survey vendors are permitted to indicate emphasis of text in a different manner, such as placing quotes (“”) or asterisks (**) around the text to be emphasized, if the CATI system does not permit any of the styles indicated above.*

- Words that appear in < > are instructions or for informational purposes only and must not be read aloud.
- “DON’T KNOW” and “REFUSED” answer categories appear in uppercase and within < > and should not be read to the respondent, but may be used for coding a response.
- Text that appears within parentheses and in both (*UPPERCASE LETTERING AND ITALICIZED*) indicate instructions for the interviewer regarding optional items. These instructions are not to be read aloud. Example: (*READ RESPONSE OPTIONS ONLY IF NECESSARY*)
- Text that appears within [SQUARE BRACKETS] are used to show programming instructions that must not actually appear on electronic telephone interviewing system screens.
- Only one language must appear on the electronic interviewing system screen.

- Some items can and should be skipped by certain beneficiaries.
 - Dependent questions that are appropriately skipped should be coded as “88-NOT APPLICABLE.”
- Skip patterns should be programmed into the electronic telephone interviewing system. For example, if a beneficiary answers “No” to a screener question, the program should skip and go to the next screener question. The dependent questions between the screener questions must then be coded as “88-NOT APPLICABLE.” Coding may be done automatically by the telephone interviewing system or later during data preparation.
- When a response to a screener question is not obtained (“98-DON’T KNOW” or “99-REFUSED” are considered responses), the screener question and any questions in the skip pattern should be coded as “M- MISSING.” In this case, the telephone interviewing system should be programmed to skip the dependent question(s) and go to the next screener question. Coding may be done automatically by the telephone interviewing system or later during data preparation.
- When a respondent suspends an interview and does not resume, the unanswered screener questions should be coded “M – Missing.”
- If after starting the survey the interview is disconnected, or the beneficiary requests a call back at a later date to complete the survey, the survey vendor may resume the call where the beneficiary left off. Please use the script provided for “Call Back to Resume a Survey.”
- Survey vendors may not underline or use bold letters to emphasize words or questions other than what is already included in the final version of the questionnaires provided by CMS.
- Please note that the telephone script contains two questions from the questionnaires that ask about receiving assistance (proxy respondent). The questions “Did someone help you complete this survey?” and “How did that person help you?” are to be completed by the interviewer based on the respondent’s (or proxy’s) role during the interview.
 - These two questions about proxy respondents may be placed after the END screen.
- In the event that a beneficiary is unable to complete the interview himself/herself, a proxy interview may be conducted provided the telephone interviewer is able to identify a suitable proxy respondent (someone who knows the beneficiary well and is able to answer health related questions about the beneficiary accurately). However, the telephone interviewer must obtain the beneficiary’s permission to have a proxy respondent assist them with the interview or complete the interview for them. If the interviewer is unable to speak to the beneficiary directly in order to identify a proxy respondent and obtain his/her permission to do the interview for them, they must not proceed with the interview. The CATI introductory script includes a script for identifying and obtaining consent to complete a proxy interview, as well as a reminder for the proxy respondent to answer the survey questions about the beneficiary.
- To ensure that proxy respondents answer survey questions about the beneficiary, all proxy survey questions must be reworded to reference the selected beneficiary (see examples below).

- o Vendors administering the survey using the CAHPS for ACOs Survey translations provided by CMS are permitted to similarly reword the CMS translation to reference the selected beneficiary.

EXAMPLES:

Q4 In the last 6 months, how many times did [BENEFICIARY NAME] visit this provider to get care for [himself/herself]? Would [he/she] say:

Q25 In the last 6 months, did [BENEFICIARY NAME] try to make any appointments with specialists?

Q34 Intro These next questions are about [BENEFICIARY NAME] and will help us to describe the people who participate in this survey.

Q34 In general, how would [BENEFICIARY NAME] rate [his/her] overall health? Would [he/she] say:

Instructions for Telephone Interviewer:

- Interviewers must ask the survey questions and record the respondent's responses in a standardized and consistent way, probing as necessary.
- Suggested probes are indicated by (*"IF NEEDED: TEXT IS IN ALL UPPER CASE LETTERING."*).
- Characters in < > are instructions or for informational purposes only and must not be read aloud.
- Text that appears within parentheses and in both (*UPPERCASE LETTERING AND ITALICIZED*) indicate instructions for the interviewer regarding optional items. These instructions are not to be read aloud. Example: (*READ RESPONSE OPTIONS ONLY IF NECESSARY*).
- "*DON'T KNOW*" and "*REFUSED*" answer categories appear in uppercase and within < > and should not be read to the respondent, but may be used for coding a response.
- Interviewers should read aloud all text that appears in lowercase letters.
- Text within a question that is in one of the following styles: underlined, or **bolded**, or **highlighted**, or IN UPPERCASE LETTERING, or *italicized* must be emphasized by the interviewer.

*Note: Survey vendors are permitted to indicate emphasis of text in a different manner, such as placing quotes ("") or asterisks (**) around the text to be emphasized, if the CATI system does not permit any of the styles indicated above.*

- In situations when a beneficiary says **Yes** to Q1 (that is, the beneficiary confirms he/she has seen the provider named in Q1), but begins to refer to a different provider later in the survey when answering questions about the named provider, the interviewer should redirect the beneficiary to answer the questions about the provider named in Q1. If the beneficiary insists he/she has not seen the named provider in the past 6 months, the interviewer may go back to Q1 and record a response of **No** to Q1.

- Interviewers must follow basic interviewing conventions such as:
 - Conducting the interview in a neutral and unbiased fashion.
 - Probing for complete answers in a neutral and professional manner.
 - During the course of the survey, use of **neutral** acknowledgment words such as the following is permitted:
 - Thank you.
 - Okay.
 - I understand.
 - I see.
 - Yes, Ma'am.
 - Yes, Sir.
 - Let me repeat the question/answer choices for you.
 - Reading all questions, transition phrases, and response options exactly as written.
 - Reading all response options in lowercase.
 - In instances when a beneficiary provides a response before the interviewer completes reading all the response options, the interviewer must continue to read all the responses. The interviewer may inform the beneficiary that all response options must be read by saying "I'm sorry but I have to read you all the answer choices."
 - Maintaining the integrity of the questionnaire content by asking each question consistently and in the correct order, and without skipping any questions inappropriately.
 - Recording responses accurately.
 - Reading questions at an appropriate speed (at a normal pace, neither too fast, nor too slow).
 - Repeating questions as necessary.
- Interviewers should avoid assuming answers ahead of time, interpreting answers provided, or suggesting answers.
- Interviewers should avoid giving their opinion, even when asked; Interviewers should provide positive but neutral feedback to maintain cooperation and to show appreciation for the respondent's contribution of time and effort.

CATI SCRIPT – NATIONAL IMPLEMENTATION SURVEY

<INTRO1-OUT IS FOR OUTBOUND CALLS. THE PURPOSE OF THE INTRO1 SCREEN IS TO PROTECT THE PRIVACY OF THE SAMPLED PERSON (SP). THE INTERVIEWER DOES NOT PROVIDE DETAILS ABOUT THE SURVEY UNTIL HE/SHE IS SPEAKING WITH THE SAMPLED PERSON. AT NO POINT DOES THE INTERVIEWER MENTION A PROVIDER NAME TO ANYONE OTHER THAN THE SAMPLED MEMBER. IN ADDITION, NO MESSAGES ARE TO BE LEFT ON AN ANSWERING MACHINE OR VOICE MAIL.>
